

PCSO Report

February/ March report for Longman 01/02/2024 to 01/03/2024

Looking at data from to current, crime remains relatively low in the beat code for your location. Below are reports made to Sussex Police in the mentioned date range. Please note that the information has been redacted, meaning no other details of these reports will be shared.

There have been no reports in the area of Long Man in the above time period.

Wealden NPT (neighbourhood policing team) continue with our Operation Downsway activity reducing KSI's (killed and seriously injured) on our roads and PC's and PCSO's across the district have been positively engaging with motorists, completing speed checks, supporting Community speed watch sessions, as well as monitoring mobile phone and seatbelt checks on drivers.

Wealden NPT has been very proactive around Op Terrain relating to a spate of stolen motorcycles in the Wealden and Eastbourne area. This has been of large focus to Wealden NPT as there has been an increase in stolen motorbikes being found in the Willingdon area.

Op Avenge is our response in Sussex to the significant rise in organised keyless vehicle theft, mainly perpetrated by organised crime groups, that present a high level of threat, risk and harm.

Op Avenge delivers focussed targeted operational activity to catch organised crime thieves and deter vehicles stolen by keyless means.

Oversight, data capture, oversight and intelligence are overseen by the Force Intelligence Bureau (FIB), however Op Avenge is an adopted force priority and therefore is supported at a force-wide level.
